INNOVATION_LAW_v1 — DIAGNOSTIC_NEVER_A_PROOF
Zeta: innovations stay positive through t=6
sigma² (log scale)
history length t
mesh Δ
1/32
1/64
1/128
1/256
Local-cusp normalization does not collapse the curves
sigma² / (2 Psi(Δ))
history length t
mesh Δ
1/32
1/64
1/128
1/256
Nested negative index retains every failure (Δ=1/256)
number of negative pivots
history length t
zeta
dh
plant
Planted quartet: monotone 2×2 hazard crosses 1
largest eigenvalue of Θ
history length t
mesh Δ
1/32
1/64
1/128
1/256
